Römork ve Karavan Kullanıcıları İçin Genel Güvenlik Açıklamaları

Aşağıdaki açıklamalara uyulmaması durumunda kaza ve yaralanma tehlikesi!

- Hızınızı mevcut sürüş ve yol koşullarına göre ayarlayın.
- Özellikle viraj alırken römorkun kargo veya yükleme durumuna göre hızınızı düşürün.
- Römork üreticisinin kullanım talimatlarına uyun.
- Römorku asla aşırı yüklemeyin.

- Römorkun doğru şekilde yüklendiğinden emin olun. (yanlış yükleme nedeniyle denge merkezinde aşırı kaymalardan kaçının)
- Ağır nesneleri mümkün olduğunca aşağıya aksların yakınına yerleştirin.
- Yüklü düşmeye veya römorktan sarmaya karşı emniyete alın.
- Römorklar insanları taşımak için kullanılamaz.
- Dikey yükü izin verilen sınırlar içinde kullanın.
- Çekici aracın izin verilen statik dikey yükünü aşmayın.
- Mümkün olduğu kadar sorunsuz sürün.
- Darbe veya çarpmalardan kaynaklanan streten kaçının.

Amaçlanan uygulama:

CYR römork bileşenleri, tedarik kapsamının bir parçasını oluşturmayan ataşmanların eklenmesiyle komple bir römork üretmek için bir araç üreticisi tarafından montaj edilir. CYR römork parçaları, tek veya çoklu dingil kategorisi 01/02 römorkları için kullanılabilir. Römork üretimi, bir genel çalışma izni ve bir sertifika gerektirir. Halka açık yollarda kullanım için uygunluk ve geçerli ulusal mevzuata uygun olmalıdır. Yukarıda "Amaçlanan uygulama" altında belirtilenden farklı veya daha kapsamlı kullanım, ekipmanların öngörülen amacına uygun olarak kabul edilmez. Üretici, ortaya çıkan zararlardan sorumlu tutulamaz.

UYARI:

- Römorkta hatalı veya profesyonel olmayan montaj ve çalışma nedeniyle kaza tehlikesi! Onarımlar, ayar ve dönüştürme çalışmaları yalnızca yetkili bir profesyonel atölye tarafından yapılmalıdır.
- Yanlış bağlanan römork nedeniyle yaralanma ve maddi hasar tehlikesi!
- Yasalara göre, her araç trafik güvenliği açısından periyodik olarak kontrol edilmelidir.
- Onaylı bir test merkezine muayene ettirilmelidir.

Şasi:

CYR şasisi, bağlantı tertibatını (küresel bağlantı/çekme halkası), kaplin, çeki demiri/çekme çubuğu, bağlantı telleri, akslar ve tekerlek frenlerini içerir.

CYR şasisi çok çeşitli aksesuarlarla desteklenebilir.

Dikkat: Akslar ve diğer ekipmanlar, civatalar ile şaseye bağlanmalıdır. Aks ile şasenin arasına uygun olmayan malzeme takılması ve kaynak ile montaj araçta yüksek güvenlik riski oluşturur. Her yolculuktan önce kontrol edin:

- Lastik dişini ve hava basıncını kontrol edin. • Jantlarda çatlaklar ve hasar var mı kontrol edin.
- Aydınlatma sistemi: Doğru çalışmasını kontrol edin • Kirko tekerleğini mümkün olduğu kadar yukarı kaldırın
- Kaplini güvenli bir şekilde yerine kilitleyin. Kaplini bağlamadan önce, toz, kir ve yağdan arındırın.
- Bağlantıların sağlam bir şekilde oturduğunu kontrol edin
- Çekici araçtaki bağlantı topuzunun çapını kontrol edin. Topuzun çapı 49,5 mm'den düşük ise, çekme tertibatını değiştirin.
- Greslülük bulunan, mafsallı noktalar gibi tüm hareketli parçaları hafifçe yağlayın. Topuzu veya yuvayı greslemeyin.

Dikkat:

- Fren balataları aşınan parçalardır ve her muayenede kontrol edilmelidir. Aşınan balatalar, yetkili bir uzman tarafından değiştirilmeli ve yeniden fren ayarı yapılmalıdır. İlk 400 km'de balata kontrol edilmeli, gerekirse yeniden ayarlanmalıdır. İlk 100 km'de özellikle dikkatli sürün.
- Bijonların tekerlek değişiminden sonraki ilk 50 km'den sonra, öngörülen gerdirmeye torkuna uyduklarından emin olmak için bijonları bir tork anahtarı kullanılarak kontrol edilmelidir. M12x1.5 sıkma torku: 80-90 Nm.

Hafif Römork Ekipmanları

General safety instructions for Trailer and Caravan users:

Risk of accident and injury if the following instructions are not observed!

- Adjust your speed according to current driving and road conditions.
- Reduce your speed according to the cargo or loading condition of the trailer, especially when cornering.
- Follow the trailer manufacturer's operating instructions.
- Never overload the trailer.
- Make sure that the trailer is loaded correctly.

(avoid excessive shifts in center of balance due to incorrect loading)

- Place heavy objects as close to the axles as possible down.
- Secure the load from falling or hanging off the trailer.
- Trailers cannot be used to transport people.
- Use the vertical load within the permissible limits.
- Do not exceed the permissible static vertical load of the towing vehicle.
- Drive as smoothly as possible.
- Avoid stress from impact or bumps.

Intended application:

CYR trailer components are assembled by a vehicle manufacturer to produce a complete trailer with the addition of attachments that do not form part of the scope of supply. CYR trailer parts are available for single or multi-axle category 01/02 trailers. Trailer production requires a general work permit and a certificate. It must be suitable for use on public roads and comply with applicable national legislation.

Use other than or more extensive than that specified above under "Intended application" is not considered appropriate for the intended purpose of the equipment. The manufacturer cannot be held responsible for any resulting damage.

WARNING:

- Risk of accident due to incorrect or unprofessional assembly and operation of the trailer! Repairs, adjustment and conversion work should only be carried out by an authorized professional workshop.
- Risk of injury and property damage due to incorrectly coupled trailer!
- By law, every vehicle should be checked periodically for traffic safety.
- It should be inspected by an approved testing center.

CHASSIS

The CYR frame includes the hitch (ball hitch/towing eye), coupling, drawbar/drawbar, tie wires, axles and wheel brakes. The CYR chassis can be supplemented with a wide variety of accessories.

Caution: Axles and other equipment must be attached to the chassis with bolts. Installing unsuitable materials between the axle and the chassis, and welding and assembly creates a high safety risk in the vehicle.

Before each trip, check:

- Check tire tread and air pressure.
- Check the wheels for cracks and damage.
- Lighting system: Check correct operation.
- Raise the jack wheel as high as possible.
- Lock the coupling securely in place. Before connecting the coupling, clean it of dust, dirt and oil.
- Check that the connections are firmly seated.
- Check the diameter of the coupling ball on the towing vehicle. If the diameter of the ball is less than 49.5 mm, replace the tow assembly.
- Lightly lubricate all moving parts with grease nipples, such as articulated points. Do not grease the knob or seat.

Attention:

- Brake pads are wearing parts and should be checked at every inspection. Worn pads should be replaced by an authorized specialist and brake adjustment should be made again. In the first 400 km, the pad should be checked and adjusted if necessary. Drive especially carefully in the first 100 km.
- After the first 50 km after a wheel change, the wheel bolts should be checked using a torque wrench to make sure they match the prescribed tightening torque.

M12x1.5 tightening torque: 80-90 Nm.
